# WEATHER OF CONCERN

## Weather of Concern

- A Red Flag Warning is in effect for the mountains and valleys of L.A. and Ventura Counties through Monday afternoon.
  - Moderate to strong Santa Ana winds will develop as offshore gradients strengthen across the region.
  - Gusty northeast winds will combine with warm, dry conditions and dry vegetation to bring critical fire weather conditions to portions of Southern California.
  - Temperatures will rise into the 80's across the valleys Sunday and Monday, with humidities in the teens and isolated single digits.
- **Active Weather Warnings, Watches and Advisories by County:**
- <https://alerts-v2.weather.gov/counties/CA>

## **WEATHER SYNOPSIS BY REGION**

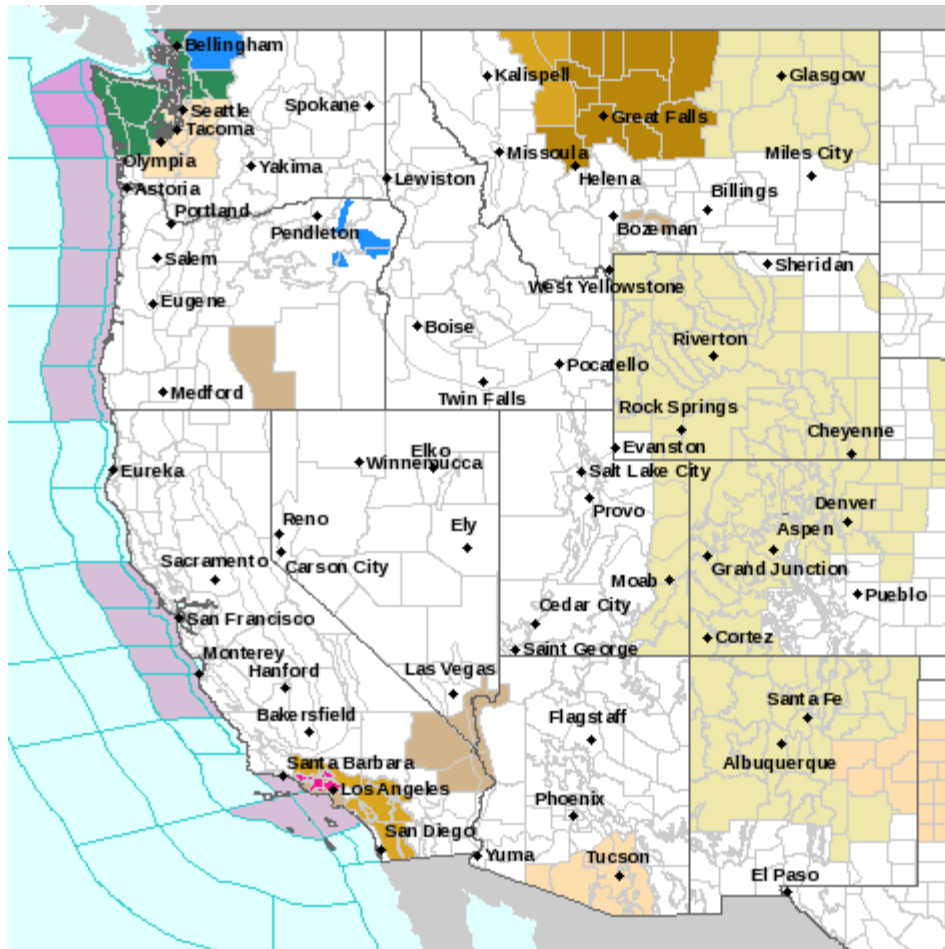

### **NORTHERN CALIFORNIA**

High pressure will remain in control into mid-week as jetstream plus storm track is deflected north. A weak wave moving into the Pacific NW will briefly flatten the ridge a bit on Tuesday, but no precipitation expected across area. North winds across the valley this morning on the order of 5 to 15 mph have precluded the formation of fog, but could still see a few patches toward daybreak. Weaker winds with subsidence and lingering moisture the next few mornings could lead to more widespread fog development but hard to pinpoint areal coverage at this point. As ridge builds, temperatures will warm several degrees from yesterday's readings with daytime highs topping out some 5 to 10 degrees above normal through the period.

### **SOUTHERN CALIFORNIA**

High pressure and offshore flow will cause warming through Monday. Gusty Santa Ana winds are expected across much of Los Angeles and Ventura counties today through Monday. Record high temperatures are possible today and Monday. A cooling trend is expected Tuesday and Wednesday as a trough moves into the Pacific Northwest and onshore flow returns. However, temperatures will likely remain above normal through the week.
